Mulig du må trykke dashboards (øverst til høyre). Jeg mener jeg gjorde det istad, men nå kom jeg rett inn på Projects.

Trykk Hopla / HoplaBackEnd Da kommer du hit.

SERVICE NAME	STATUS	RUNTIME	REGION	DEPLOYED
HoplaAdmin	Failed deploy	Static	Global	31min
Hopla	Deployed	Docker	Frankfurt	12h
HoplaSql	Available	PostgreSQL 16	Frankfurt	16d

Du skal så inn på Hopla og HoplaSql. IKKE HoplaAdmin (det er ikke farlig å gå inn der, men ser ikke ut som man kan betale noe for det).

Hopla -> Trykk “Upgrade your instance”

Først må du nok trykke «Update Billing». Her inne legger du inn kortdetaljer. Etter du har lagt inn kortdetaljer, må du tilbake til denne siden. Så trykker du «Starter» \$7/month

Payment method required Please add a card to upgrade your plan.

Upgrade to enable more features
Free instances spin down after periods of inactivity. They do not support SSH access, scaling, one-off jobs, or persistent disks. Select any paid instance type to enable these features.

For professional use
For more power and to get the most out of Render, we recommend using one of our paid instance types. All paid instances support:

- Zero Downtime
- SSH Access
- Scaling
- One-off jobs
- Support for persistent disks
